Medartis launches TITAN Nail System for intramedullary fixation of hand fractures in the US

Warsaw, Indiana - 7 August 2026: Medartis Inc. today announced the official U.S. launch of the TITAN Nail System, expanding the company's upper extremity trauma portfolio with a intramedullary fixation solution designed to address fractures of the phalanges and metacarpals.

The first clinical use of the TITAN Nail System was recently performed by **Kelly Babineaux, MD** at **University Medical Center New Orleans** on July 29, 2026. The procedure marks the start of the system's US rollout. as surgeons across the United States begin to gain access to Medartis' newest fixation platform. The new Titan nail stabilizes the bone from within rather than with a plate-and-screw construct and is designed to reduce soft-tissue exposure and operating time in suitable indications.

"The launch of the TITAN Nail System represents years of collaboration between our engineering clinical, and commercial teams," said **Rachel Edwards, VP of Marketing, Medartis Inc.** *"We're excited to bring surgeons a thoughtfully designed intramedullary fixation system that reflects Medartis' commitment to precision, procedure efficiency, and innovation. Seeing the first successful case performed is an important moment, but it's only the beginning. We look forward to supporting surgeons as they begin incorporating TITAN into their practices."*

The TITAN Nail System was engineered to provide surgeons with a next-generation intramedullary fixation solution that combines immediate bite force, low and controlled insertion torque, and self-holding instrumentation. Together, these features are intended to simplify nail insertion, enhance procedural efficiency, and provide confident fixation throughout the surgical flow. The implant is delivered in a new procedure kit that is flexible and asset-light for hospitals.

The TITAN Nail received FDA 501(k) clearance in April of 2026 and is now commercially available. Surgeons interested in learning more about the TITAN Nail System or scheduling product training can contact their local Medartis representative or visit www.medartisusa.com.
