

Rejoint® YourKnee™ received extended range of sizes CE Mark Approval

Rejoint, provider of "Patient Specific" 3D Printed Total Knee Replacements that enhance clinical outcomes, announced today that it has received Conformité Européene (CE) Mark approval for the complete extended range of sizes of the Rejoint YourKnee TKA.

Rejoint now in European Union and other CE Mark geographies offers more than 6.300 femoral variations including multiple designs and coatings. FDA is expected in Q2 2021.

Rejoint YourKnee is a "Patient Specific" holistic solution that provides personalized knee replacement and surgery recovery follow-up through the analysis of the patient's anatomy, the implant design and surgery simulation based on anatomy data and thanks to the Artificial Intelligence outcomes. Through the production of a "Patient Specific" implant by the last generation of 3D printing technology reducing patient pain, speeding up the recovery with a competitive price.

Through the delivery of "Patient Specific" and "Computer Assisted" surgical tools for a personalized surgery together with an integrated system of dedicated wearables to monitor and to track remotely the surgery recovery and patient rehabilitation.
