

GMReis Receives FDA Clearance for Versalock Hand Plate  
December 13, 2024

GMReis, an orthopedic device company, announced FDA (k) Clearance to market the comprehensive Versalock Hand Plating System.

This system contains variable angle self-retaining and self-tapping screws from Ø1.3 to Ø2.0 mm and, in addition to the standard plates, offers a range of specific fragment plates for trauma such as scaphoid, proximal 1st metacarpal (dorsal and lateral), metacarpal neck, phalanx head and a metacarpal/phalanx plate that allows correction of angulation and rotation.

A rizarthrosis arthrodesis plate is also available in this set.
