

GMReis Achieves First 100 Hand and Wrist Procedures in Florida

June 16, 2026 / GMReis is proud to announce the successful completion of its first 100 hand and wrist procedures in Florida utilizing the Versalock™ Hand & Wrist Plating System.

This milestone was achieved without any implant-related complaints or system failures, further validating the performance of the Versalock platform, including its proprietary locking technology and anatomically designed plating solutions.

The positive clinical experience and surgeon feedback reinforce GMReis' commitment to delivering innovative, reliable, and high-quality orthopedic solutions to the U.S. market.

Building on this successful introduction in Florida, GMReis plans to expand the availability of the Versalock™ system to additional states across the United States as part of its continued growth strategy.

We thank the surgeons, hospitals, and distribution partners who have contributed to this important achievement.
